EDUCATION

Bachelor of Technology (B.Tech) in Artificial Intelligence and Machine Learning Aug. 2022 – May 2026
MPSTME, NMIMS University

EXPERIENCE

AI/ML Engineer Intern June 2025 – Present
PenPixel LLP

- Engineered and deployed LLM-driven automation frameworks for document parsing, sentiment analysis, and summarization, cutting manual review time by 45% and enhancing operational efficiency.
- Devised advanced preprocessing pipelines in Python (Pandas, NumPy) for mixed data formats, elevating ML model precision by 18% while reducing preparation time by 35%.
- Incorporated generative AI APIs (OpenAI, Hugging Face Transformers) into enterprise tools, enabling features like semantic search and multi-turn conversational agents.
- Streamlined model serving with Docker, CI/CD, and GPU-optimized inference, achieving a 30% faster response time and sustaining throughput for 1M+ monthly requests.

Machine Learning Engineer Intern Dec. 2024 – Jan. 2025
Saiket Systems

- Revamped a recommendation engine using collaborative filtering and matrix factorization, increasing click-through rates by 15% and improving recommendation diversity.
- Architected a fault-tolerant ETL pipeline handling 12K+ daily interaction logs, guaranteeing high-integrity datasets for analytics and ML training.
- Optimized hyperparameters via grid search and k-fold cross-validation, trimming model runtime by 20% without loss in predictive accuracy.
- Crafted data visualizations in Matplotlib and Seaborn that informed executive-level strategy for product engagement.

PROJECTS

GNN-Based Book Recommendation System July 2025

- Developed a Graph Neural Network (PyTorch Geometric) for user–book interaction modeling, boosting accuracy by 12% over collaborative filtering benchmarks.
- Applied graph sampling and efficient batching to achieve near real-time recommendation speeds at production scale.
- Created hybrid feature vectors from metadata and learned embeddings, enhancing personalization depth and recommendation novelty.
- Conducted A/B testing and rigorous evaluation (Precision, Recall, F1-score) to validate deployment readiness.

Face-to-Comic Style Transfer Using Pix2Pix GAN May 2025

- Trained Pix2Pix GAN with a combined L1 and adversarial loss, reaching 92% style accuracy and minimizing distortion artifacts.
- Enhanced dataset diversity with augmentation strategies, improving model generalization on unseen samples.
- Built and launched a Streamlit-based interactive demo, enabling real-time style transfer and public testing.
- Refined training with adaptive learning rates and regularization, accelerating convergence by 30%.

English–Hindi Translation Using Transformer Feb. 2025

- Constructed a Transformer model in PyTorch achieving a BLEU score of 77, outperforming seq2seq baselines by 18%.
- Formulated a custom Byte Pair Encoding (BPE) tokenizer that reduced rare-word translation errors by 15%.
- Tuned training with learning rate schedulers and gradient clipping, shortening training cycles by 20%.
- Benchmarked performance with BLEU, METEOR, and ROUGE to ensure linguistic accuracy and fluency.

TECHNICAL SKILLS

Languages: Python, SQL, C++, R

Frameworks: TensorFlow, PyTorch, Keras, XGBoost, LightGBM, FastAPI

Tools: Power BI, Excel, Streamlit, Docker, Git, Jupyter Notebook, Google Colab

Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Hugging Face, LangChain, NLTK, spaCy

Domains: Deep Learning, Data Science, MLOps, Natural Language Processing, Computer Vision, Recommendation Systems

CERTIFICATIONS

- Machine Learning Specialization (Coursera, DeepLearning.AI) Aug. 2024
- Mathematics for Machine Learning and Data Science Specialization (Coursera) Jan. 2024
