EDUCATION

Bachelor of Technology (B.Tech) in Artificial Intelligence & Machine Learning

MPSTME, NMIMS University

Graduation: May 2026

EXPERIENCE

Software Developer Intern

Bizinso pvt.ltd (Mumbai)

June 2025 – July 2025

- Worked on BizSocial, a CRM platform inspired by Odoo that unified Facebook, Instagram, LinkedIn, WhatsApp, YouTube, and Twitter/X.
- Built backend APIs using Django REST Framework for OAuth login, post scheduling, publishing, and Analytics across platforms.
- Created responsive frontend components using React.js and React-Bootstrap for managing posts and tracking performance.
- Integrated Meta Graph API, LinkedIn API, YouTube Data API, Twitter API, and WhatsApp Business API.
- Deployed the application securely using Apache2 with SSL certification (HTTPS).

Software & ML Engineer Intern

Applied Cloud Computing pvt.ltd (Mumbai)

feb 2026 – May 2026

- Developed and designed an AI chatbot using a Large Language Model (LLM) with a Retrieval-Augmented Generation (RAG) framework.
- Built a retrieval system to extract relevant data from the company's knowledge base, which helped in improving the accuracy of responses and minimizing hallucinations.
- Integrated the chatbot with the company's live website, which allowed for real-time user interaction and automatic customer query resolution.
- Optimized the solution in the production environment, which ensured scalability, efficiency, and smooth user experience.

PROJECTS

Resume Parser & Job Recommendation System (Full-Stack Project)

Tech Stack: Python, FastAPI, Hugging Face (T5), NLP, REST APIs, Docker

- Developed an automated resume parsing and job recommendation platform.
- Integrated a fine-tuned T5 model to generate personalized explanations for recommendations, improving user engagement.
- Exposed recommendation and explanation services via RESTful APIs using FastAPI, demonstrating end-to-end MLOps workflow.

COVID-19 Global Dashboard Using Power BI (Analytics Project)

Tech Stack: Power BI, Microsoft Excel/CSV, Power Query Editor, DAX, Python, R

- Designed an interactive Power BI dashboard using WHO datasets to track global infection trends.
- Modeled a snowflake schema and applied data transformations to optimize refresh performance.
- Created KPI metrics using DAX to deliver real-time insights for public health analysis.

PropFind : Real Estate Listing & Rental Management Platform (Software Engineering Project) Tech

Stack: Next.js 16, TypeScript, PostgreSQL, Prisma, NextAuth, Cloudinary, Razorpay, Leaflet.js, OSRM.

- Built PropFind, a full-stack real estate platform with listings, payments (Razorpay), Google OAuth, and map view using Next.js, PostgreSQL and Prisma — deployed live on Vercel.
- Implemented workplace commute finder using Dijkstra's algorithm via OSRM and integrated Gemini AI for auto-generating property descriptions.

TECHNICAL SKILLS

- **Languages:** Python, SQL, C++, R, JavaScript (ES6+).
- **Frameworks & Libraries:** Django, Flask, React.js, Tailwind CSS, Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Matplotlib, Seaborn, LangChain, NLTK, spaCy, plotly.
- **Tools, Cloud & MLOps:** MongoDB, MySQL, SQLite, Git, Docker, Streamlit, Power BI, Tableau, Postman, Socket.IO.
- **Soft Skills:** Problem-Solving, Communication, Critical Thinking, Team Collaboration, Adaptability.

CERTIFICATIONS

- Google Data Analytics Professional Certificate (Google, Coursera) February 2025
- Machine Learning Specialization (DeepLearning.AI, Coursera) June 2024
- The Complete AI Guide: ChatGPT & Generative AI (Udemy) January 2024
- N8n Course: No-Code AI Agent Builder (Simplilearn) June 2025

ACHIEVEMENTS & POSITIONS OF RESPONSIBILITY

- Solved 150+ coding problems on LeetCode covering Arrays, Graphs, and Dynamic Programming.
- Completed all SQL and Python skill certification tracks on HackerRank.
- Organized and conducted coding club workshops for 100+ students, focusing on problem-solving and core programming concepts.
